

HAVE YOU DONE YOUR **A.R.T.** TODAY?

BY SHELBY HIADAN, LECTURER, NIEC (NP)

Have you...

Addjusted your activities to accommodate all children?

Reached out to children who need extra help?

Taught in the manner to support, encourage, and engage all children in your class?

ALWAYS REMEMBER:

- Inclusive classrooms build in approaches to curriculum and teaching that adjust to the real needs and learning styles of children.
- ▶ All students have the opportunity to learn about diversity, compassion and creating more inclusive societies.
- ♥ Teachers are able to support learning needs, encourage participation and engagement and manage challenging behaviours.

BONUS: CREATE YOUR OWN MOVEMENT CUBE!

Cut on solid lines and fold on dashed lines. On each side of the cube, draw a movement that the child can recreate. We have provided an example; now it's your turn!
