

THE NIEC EXPERIENCE

TRAINING AT NIEC AND BEYOND GRADUATION

Receive Training from our Experienced Faculty!

Be trained by dedicated and experienced lecturers who come with deep expertise and knowledge.

They are invited by the media to share their expertise on the early childhood education profession with the public.

Putting Theory in Practice

Learning goes beyond the classroom! Our lessons blend theory with hands-on training across areas such as infant care practice, music and movement, and more.

Through real-world practicum experiences, you will have the opportunity to put your learning into practice, building the practical skills and confidence needed to thrive.

Examples of Mode of Assessment

Group and Individual Assessments

Knowledge-Based Assessments

Class Presentations

Teaching Demonstrations

Practicums

Note: Self-sponsored applicants will be required to secure an ECDA-licensed preschool centre for practicums.

Supporting your Growth Beyond Graduation and your Career

We collaborate with a wide range of partners to enrich and elevate the student experience through learning journeys, workshops, networking events and stress busters—helping students build relevant skills and connect with the wider early childhood educator fraternity.

Learning journey where students and alumni came together to explore the power of outdoor learning

Storybox Workshop Series, a creative journey for our students, alumni and faculty.

Networking session for our NIEC male educators and alumni community

We welcome students in bringing their ideas to life through ground-up, student-led initiatives that make a meaningful impact!

Some discover the calling to early childhood education later in life. We hope that working adults who have had careers before can pursue their passion through the multiple pathways for mid-career transitions.
